Description

The Ruko-244188 M8 thread assembly tool is an effective solution for repairing damaged threads in various materials. This system restores the functionality of screws and bolts, ensuring a secure and long-lasting fastening. It is easy to use and involves a four-step process: drilling, tapping, mounting the threaded insert, and breaking the threaded end. The tool is designed to facilitate the installation of a retaining sleeve, ensuring that the new thread fits perfectly to the required specifications.

- **Compatibility:** Designed for M8 threads.
- **Material:** Made from high-quality materials for increased durability.
- **Installation Process:** Includes drilling, tapping, and sleeve assembly.
- **Use of Cutting Oil:** Recommended for a better finish on tapping.
- **Accuracy:** Ensures that the tap and bolt have the same thread and pitch.
- **Clear Instructions:** Detailed process for correct installation.
- **Safety:** Precautions to avoid damage to the retaining pin.
- **Versatility:** Ideal for Applications in mechanics and maintenance.
- **Easy to use:** An accessible tool for professionals and hobbyists.
- **Performance:** Ensures a strong and functional new thread.

Specifications

High	5,00
Width	5,00
EAN	4007140366450
Manufacturer	Ruko
Weight (kg)	0,7200
Depth	17,00
