Description

The Ruko-266040UNC is a machine tap specifically designed for threading blind holes. This tap features a reinforced shank for increased durability and strength. The right-hand helical flutes, with a 35° RSP angle, allow for efficient and precise cutting, ensuring optimal results in industrial applications. The American UNC coarse thread is perfect for those requiring a robust and reliable finish on their projects. Furthermore, the tap flanks undergo a back-ground process, which improves cut quality and extends tool life.
