The Ruko-266080UNC is a machine tap specifically designed for threading blind holes. This tap features a reinforced shank for increased durability and strength. The right-hand helical flutes, with a 35° RSP angle, allow for efficient and precise cutting, ensuring optimal results in industrial applications. The American UNC coarse thread ensures broad compatibility with different types of fasteners, while the offset flank grinding improves the thread finish quality, reducing the risk of damage to the workpiece.
