Product sheet

RUKO M10 single-pass, ground, high-precision threading taps.

Brand: Ruko

Reference: TUR 244610

Ruko-244610 single-pass taps, made of HSS. Designed for M10 threads in unalloyed steels, malleable cast iron, and non-ferrous metals. They allow for manual and mechanical cutting in a single step, ideal for precision work.

Description

Ruko-244610 taps are single-pass tools made of high-speed steel (HSS), specifically designed for creating through threads in a variety of materials. These taps are ideal for use on unalloyed and low-alloy steels with a tensile strength up to 800 N/mm², as well as malleable cast iron and non-ferrous metals. Its design allows thread cutting to be performed both by hand and by machine, optimizing the process in a single work step.

- **Material:** High-speed steel (HSS)
- **Type:** Single-pass taps
- **Application:** Through threading in unalloyed and low-alloy steels
- **Maximum strength:** Up to 800 N/mm²
- **Compatibility:** Malleable cast iron and non-ferrous metals
- **Cutting:** Possibility of manual and mechanical cutting
- **Process:** Single-pass cutting
- **Accuracy:** Ground for an optimal finish
- **Use:** Ideal for industrial and workshop applications
- **Dimensions:** M10 Thread

These taps are a reliable choice for professionals seeking efficiency and quality in their machining projects.

Specifications

High	2,00
Width	2,00
EAN	4007140313553
Manufacturer	Ruko
Weight (kg)	0,2400
Depth	12,00
