Product sheet

RUKO M14 single-pass, ground, high-precision threading taps.

Brand: Ruko

Reference: TUR 244615

Ruko-244615 single-pass taps, made of HSS. Designed for through threads in unalloyed steels, malleable cast iron, and non-ferrous metals. They allow for manual and mechanical cutting in a single pass, with a resistance up to 800 N/mm².

Description

Ruko-244615 taps are high-precision tools designed for creating through threads in a wide variety of materials. Made from high-speed steel (HSS), these taps are ideal for working with unalloyed and low-alloy steels with a tensile strength of up to 800 N/mm², as well as malleable cast iron and non-ferrous metals. Its single-pass design allows thread cutting in a single step, optimizing working time and improving machining efficiency.

- **Material:** High-speed steel (HSS)
- **Type:** Single-pass taps
- **Applications:** Threading in unalloyed and low-alloy steels
- **Maximum strength:** Up to 800 N/mm²
- **Compatibility:** Malleable cast iron and non-ferrous metals
- **Cutting:** Possibility of manual and mechanical cutting
- **Process:** Single-step thread cutting
- **Accuracy:** High machining accuracy
- **Durability:** High wear resistance
- **Use:** Ideal for industrial and workshop applications

These taps are a reliable choice for professionals seeking quality and efficiency in their machining projects.

Specifications

High	3,00
Width	3,00
EAN	4007140366603
Manufacturer	Ruko
Weight (kg)	0,5000
Depth	13,00
