RUKO type N twist drill Ø 3.60 mm with carbide cutting insert

Brand: Ruko

Reference: TUR 815036

Ruko-815036 DIN 338 Type N Twist Drill Bit, 3.60 mm diameter, made of HSS-G with a brazed carbide cutting insert. Ideal for drilling high-strength steels, requires continuous cooling for optimal performance.

Description

The Ruko-815036 twist drill bit is a high-precision tool designed to meet the demands of drilling high-strength materials. Made of HSS-G, this drill bit features a brazed carbide cutting insert, ensuring exceptional durability and performance. Its helical design allows for efficient chip evacuation, optimizing the drilling process and reducing the risk of clogging. The fine-grained K20 material is ideal for universal use, offering versatility in various industrial applications.

- **Diameter:** 3.60 mm
- **Type:** DiN 338 Type N Twist Drill
- **Material:** HSS-G with brazed carbide cutting insert
- **Grain:** K20, suitable for universal use
- **Applications:** Drilling in high-strength steels
- **Cooling:** Permanent coolant is recommended for high-strength steels
- **Durability:** High wear resistance
- **Chip evacuation:** Efficient thanks to its helical design
- **Use:** Ideal for industrial and mechanical applications
- **Compatibility:** Compatible with standard drills

Specifications

High	2,00
Width	2,00
EAN	4007140353221
Manufacturer	Ruko
Material	Metal
Weight (kg)	0,0100

Depth	7,50
