

## Product sheet

## RUKO type N twist drill Ø 7 mm with carbide cutting insert

Brand: Ruko

Reference: TUR 815070

Ruko-815070 DIN 338 Type N Twist Drill Bit, 7.00 mm diameter, made of HSS-G with a brazed carbide cutting insert. Ideal for drilling high-strength steels, requires continuous cooling for optimal performance.

### Description

The Ruko-815070 twist drill bit is a high-precision tool designed to meet the demands of drilling high-strength materials. Made of HSS-G, this drill bit features a brazed carbide cutting insert, ensuring exceptional durability and performance. Its helical design allows for efficient chip evacuation, optimizing the drilling process and reducing the risk of clogging. The fine-grained K20 material used in its manufacture makes it suitable for universal use, being especially effective in high-strength steels, provided it is used with continuous cooling.

- **Type:** DiN 338 Type N Twist Drill
- **Diameter:** Ø 7.00 mm
- **Material:** HSS-G with brazed carbide cutting insert
- **Grain:** K20, suitable for universal use
- **Applications:** Drilling in high-strength steels
- **Cooling:** Requires continuous cooling for high-strength steels
- **Durability:** High wear resistance
- **Chip evacuation:** Optimized design for efficient chip evacuation
- **Precision:** High precision in the drilling process
- **Use:** Ideal for professional and industrial applications

### Specifications

|              |               |
|--------------|---------------|
| High         | 3,00          |
| Width        | 3,00          |
| EAN          | 4007140353528 |
| Manufacturer | Ruko          |
| Material     | Metal         |

|             |        |
|-------------|--------|
| Weight (kg) | 0,0200 |
| Depth       | 11,00  |
