**STD. ABRASIVES 76 mm
abrasive disc, 120 grit, Lockit
system, high durability.**

Brand: Std. Abrasives

Reference: TUR 592558

Pink aluminum oxide abrasive disc, designed for long-lasting durability and lower operating temperatures when working with ferrous metals. Ideal for flat surfaces on aluminum alloys, high-nickel steels, and heat-sensitive materials. Lockit locking system.

[View product online](#)**Description**

The Std. Abrasives-592558-Dis A/O X.2C/Lockit 76-120 abrasive disc is designed to deliver superior performance in demanding industrial applications. Made from high-quality aluminum oxide, this disc features a distinctive pink color and is characterized by its longer lifespan compared to other abrasive discs. Its design allows for lower heat generation when working on ferrous metals, making it an ideal choice for treating heat-sensitive materials.

This disc is especially effective for roughing and finishing flat surfaces on high-hardness materials, such as aluminum alloys used in the aerospace industry, high-nickel steels, and chromium alloys.

Its high abrasive power ensures optimal results and greater work efficiency.

The Lockit - Roloc locking system facilitates quick and secure disc changes, thanks to its threaded nylon male fitting that attaches to the Roloc backing plate with a simple half turn.

- Material: Aluminum Oxide
- Color: Pink
- Longer lifespan
- Lower heat generation
- Ideal for aluminum alloys and high-nickel steels
- High abrasive power
- Compatible with Lockit - Roloc system
- Quick and secure change
- Use on heat-sensitive materials

- Dimensions: 76 mm diameter

Specifications

High	0,00
Width	0,00
EAN	8435130704733
Manufacturer	Std. Abrasives
Weight (kg)	0,0000
Depth	0,00
