GUILLET 280mm threaded extension for Megadrill modular system

Brand: Guillet

Reference: TUR 8697

Guillet-8697 280mm extension for the Megadrill modular system. Ideal for deep drilling, it adapts to various situations. Requires maintenance of the threaded parts and hammer alignment for optimal performance and to prevent jamming.

Description

The Guillet-8697 Threaded Extension, part of the Megadrill modular system, is a tool designed to optimize the drilling process in various applications. Measuring 280 mm in length, this extension easily attaches to the adapter, allowing for drilling to a depth of up to 1 meter with ease. Its modular design ensures adaptability to different drilling situations, facilitating work in demanding environments.

To ensure optimal performance, it is essential to make forward and backward movements during drilling, which helps to clear debris and prevent blockages. Additionally, it is important to keep the hammer aligned on its axis to avoid complications during use.

It should be noted that, at greater depths, the drilling speed may decrease, requiring careful handling of the tool.

To prolong the service life of the Guillet-8697, it is essential to keep the threaded parts lubricated and protected from dust and moisture.

- Length: 280 mm
- Compatible with the Megadrill modular system
- Facilitates drilling up to 1 meter
- Recommended movements: forward and backward
- Prevents jams and releases debris
- Keeps the hammer aligned on its axis
- Slower drilling at greater depths
- Threaded parts must be lubricated

- Protection against dust and moisture
- Modular design to adapt to various situations

Specifications

High	34,00
Width	3,50
EAN	3660354086975
Manufacturer	Guillet
Weight (kg)	0,8700
Depth	3,50
