Description

The Olfa-MXP-AL aluminum utility knife is a high-end cutting tool designed to deliver exceptional performance in a variety of applications. Its X-shaped handle, made of Metal Hyper PRO, combines the strength of die-cast aluminum with the comfort of non-slip elastomer fiber, ensuring a secure and comfortable grip during use. This utility knife is equipped with an extra-sharp 18 mm Excel Black blade, ideal for cutting thick and hard materials such as flooring and plasterboard.

The automatic locking system with a non-slip trigger provides added safety, preventing accidental blade opening. Furthermore, the stainless steel blade channel is fully hardened, ensuring high flexural strength, and a chrome finish protects against wear.

The trigger design is wider and thinner than conventional models, making it easier to use without interference. The cutter also features a convenient hole at the end of the handle, allowing you to attach a safety lanyard or hang it on a wall, increasing its versatility in work environments where strict safety control is required.

Sliding Trigger: Special design to prevent clogging

Lanyard Hole: For safety and storage

Recommended Use: Cutting thick and hard materials

Specifications

Height	1,50
Width	9,50

Colour	aluminium
PAN	91511220254
Manufacturer	Olfa
Material	Aluminio
Weight (kg)	0,1280
Depth	22,00
