Description

The Kukko-120-10 is a Vario 2-leg universal bearing puller designed for easy removal of bearings, sprockets, discs, and other mechanical components. Its innovative system allows for quick changing or rotating of the puller legs using a simple locking mechanism activated by pressing down. This puller is versatile, as it can be used for both external and internal removal simply by rotating the puller hooks as needed. Furthermore, the depth stop on the spindle heads ensures the wrench does not slip during use, providing greater safety and efficiency.

The Kukko-120-10 features standard puller hooks that are progressively adjustable along the crossbar, allowing for precise adaptation to different part sizes. Its mechanical spindle and interchangeable spindle tip ensure smooth and efficient operation. The rolled thread is treated with a special coating that enhances its durability and performance.

For applications where there is sufficient space to handle the workpiece, the use of a 3-arm puller is recommended for optimal load distribution.

- Vario 2-Leg Universal Puller (150 x 100 mm)
- Quick leg change with locking mechanism
- Suitable for external and internal extraction
- Depth stop on spindle heads
- Standard and adjustable extraction hooks
- Mechanical spindle for greater precision
- Interchangeable spindle tip
- Rolled thread with special coating

- Recommended for use with a 3-arm puller in spacious areas
- Components available as replacement parts

Specifications

EAN	4021176918599
Manufacturer	Kukko
Weight (kg)	1,1600
