

Product sheet

Set of 3 PULLPO extraction hooks with easy assembly system and identifying colors.

Brand: Kukko

Reference: TUR 70-012-S

Kukko-70-012-S is a set of 3 PULLPO extraction hooks, designed for easy handling. Its color-coded extraction legs are compatible with the 70-0 series spindle, allowing for non-destructive bearing removal.

Description

The Kukko-70-012-S is a set of 3 PULLPO extraction hooks designed to facilitate the non-destructive removal of grooved ball bearings without the need to disassemble the shaft. This mounting system ensures simple and efficient handling, allowing users to perform maintenance tasks with greater precision and safety. The extraction legs are specially developed for precise mounting on bearing rails, ensuring optimal support and maximizing disassembly forces.

- **Compatibility:** Designed for use with 70-0 series spindles.
- **Non-destructive extraction:** Allows for bearing removal without damaging the shaft.
- **Precise mounting:** Extraction legs adapted for a perfect fit on bearing rails.
- **Color identification:** Different leg types are color-coded for easy identification.
- **Increased disassembly force:** Optimized structure to withstand greater forces during the extraction process.
- **Durability:** Manufactured from high-quality materials for a long service life.
- **Ergonomic design:** Facilitates handling and operation during use.
- **Versatility:** Ideal for applications in various industries and work environments.
- **Easy storage:** Compact and lightweight, allowing for easy storage.
- **Simplified maintenance:** Reduces the time and effort required for machinery maintenance.

Specifications

EAN	4021176181313
Manufacturer	Kukko
Weight (kg)	0,6200
