Description

The Kukko-K-20-1+ST 2-Leg Puller Set is an essential tool for any workshop, designed for versatility and efficiency in parts removal. This set allows for up to four different puller configurations by combining standard and ST hooks, as well as extensions. Its optimized design ensures quick adjustment, providing high clamping force and exceptional ease of use. The puller arms are slim and trapezoidal, making them ideal for working in confined and hard-to-reach spaces.

The spindle fits optimally on the shaft thanks to its reversible tip, and the rolled thread has a special coating for increased durability. The puller hooks are progressively movable along the crossbar, allowing for efficient use even under maximum load.

In addition, the 2-arm crossbar features a hexagonal profile that ensures a firm grip.

- Slim pull-out legs for tight spaces.
- Manual adjustment knurl for quick hook sliding.
- Versatile use as external and internal pullers.
- Suitable for asymmetrical machined parts.
- Depth stop on the spindle heads to prevent slippage.
- Components available as replacement parts.
- Operating instructions included in the lid.
- Safe storage in special foam.
- Parallel pull-out hooks in every position.
- The entire assembly is presented clearly and neatly.
