Description

The Kukko-K-2030-10+S+T puller set is an essential tool for any workshop, designed for versatility and organization. This set allows you to combine various puller jaws and extensions, creating up to 24 different puller models from a single set. Its innovative design and advanced functionality guarantee optimal performance in a variety of applications.

This set includes the basic equipment for 2- and 3-arm pullers, equipped with three different puller hook variants. The extensions allow you to increase the clamping depth up to 350 mm, making it ideal for a wide range of tasks. The two-arm version is compact, while the three-arm version ensures even load distribution, providing a secure grip on the workpiece.

The design allows the puller hooks to remain parallel in any position, even under load. The workpiece rests only on the hook surfaces, ensuring a smooth extraction process.

In addition, the crossbar collar features a hexagonal profile for easy wrench use, and the spindle heads have an anti-slip strip.

- Basic equipment for 2- and 3-arm pullers.
- Three puller hook variants.
- Extensions to increase clamping depth up to 350 mm.
- Design that allows parallel hooks in any position.
- Smooth pulling supported on hook surfaces.
- Crossbar collar with hexagonal profile.
- Spindle heads with anti-slip strip.

- KUKKO-L-Boxx system for better organization.
- Front handle for greater portability.
- QUICK ADJUST and ARMLOCK technology for maximum stability.

This set is suitable for removing transmission gears, bearings, pinions and synchronizer bodies, and can be used both externally and internally, even for asymmetrical parts.
