Product sheet

MODICON bus termination distributed I/O solution for bus connection

Brand: SCHNEIDER

Reference: IMPO STBXMP1100

Bus termination for the Modicon STB distributed I/O solution. This connection accessory is essential for completing the bus installation, ensuring optimal and efficient operation in industrial automation systems. Compatible with the STB range.

Description

The STB bus termination is an essential component within the Modicon STB range of distributed I/O solutions. Designed to optimize communication and performance in automation systems, this bus termination ensures a reliable and efficient connection in industrial environments. Its implementation is crucial to prevent signal reflections and ensure data integrity on the network, resulting in more stable and secure operation of connected devices. This accessory is compatible with various bus configurations, making it a versatile option for different applications.

- **Compatibility:** Designed for Modicon STB systems.
- **Function:** Bus termination to optimize communication.
- **Prevention:** Minimizes signal reflections on the network.
- **Installation:** Easy to integrate into existing configurations.
- **Durability:** Robust construction for industrial environments.
- **Reliability:** Ensures the integrity of transmitted data.
- **Versatility:** Compatible with various bus configurations.
- **Performance:** Improves the stability of the automation system.
- **Accessory:** Separate part within the connection accessories category.
- **Applications:** Ideal for industrial automation environments.

Specifications

EAN	3595862053655
Manufacturer	Schneider
Reference	SCHNEIDER STBXMP1100
Series	Solera Mural
