

Product sheet

SCHNEIDER AV 200-500V control module, 3 poles, model G115/225.

Brand: SCHNEIDER

Reference: IMPO LX1G3QLSEA

Control module for 200-500V electrical systems, designed for three-phase applications. Model G115/225, ideal for optimizing performance and safety in industrial installations. Its robust design ensures durability and efficient operation.

Description

The 200-500V Av 3P G115/225 Control Module is a device designed for the efficient management of electrical systems in industrial and commercial environments. This module allows for the control and monitoring of voltages in a range of 200 to 500V, ensuring safe and reliable operation. Its robust design and ability to operate under demanding conditions make it an ideal solution for applications requiring precise control and high availability. Equipped with advanced technology, this module ensures a rapid response to voltage variations, contributing to the protection of connected equipment and optimizing the performance of the electrical system.

- **Voltage Range:** 200-500V
- **Phases:** 3 phases
- **Model:** G115/225
- **Connection Type:** Quick and Secure Connection
- **Protection:** Overvoltage and Undervoltage
- **Dimensions:** Compact for easy integration
- **Operating Temperature:** Wide temperature range
- **Certifications:** Complies with international standards
- **Installation:** Simple and quick
- **Applications:** Ideal for industrial environments and commercial

Specifications

EAN	3606481946188
Manufacturer	Schneider
No. of poles	3P
Reference	SCHNEIDER LX1G3QLSEA

Nominal voltage (V)	500V
