

Product sheet

SCHNEIDER 200-500V, 3-pole, G400/500 control module for electrical management.

Brand: SCHNEIDER

Reference: IMPO LX1G3SLSEA

Control module designed to operate within a voltage range of 200-500V. Compatible with three-phase systems, model G400/500. Ideal for industrial applications requiring efficient and safe electrical power control.

Description

The 200-500V Av 3P G400/500 Control Module is a device designed for the efficient management of electrical systems in industrial environments. This module allows for the control and monitoring of voltages in a range of 200 to 500 volts, ensuring optimal and safe operation of connected equipment. Its robust design and ability to operate under demanding conditions make it an ideal solution for applications requiring precise and reliable control. Furthermore, its compatibility with three-phase systems ensures easy integration into various electrical configurations.

- **Voltage Range:** 200-500V
- **Connection Type:** 3-phase
- **Model:** G400/500
- **Dimensions:** Compact for easy installation
- **Material:** Robust construction for industrial environments
- **Protection:** Integrated overload protection system
- **Compatibility:** Suitable for various electrical systems
- **Monitoring:** Advanced control and monitoring functions
- **Operating Temperature:** Wide range for extreme conditions
- **Certifications:** Complies with international safety standards

Specifications

EAN	3606481946249
Manufacturer	Schneider
No. of poles	3P
Reference	SCHNEIDER LX1G3SLSEA
Nominal voltage (V)	500V
