Product sheet

SCHNEIDER 4-pole control module, 100-250V, 500W, ideal for electrical management.

Brand: SCHNEIDER

Reference: IMPO LX1G4SKUEN

Control module for 100-250V voltages, designed with 4 poles. Ideal for industrial and commercial applications, it offers an efficient and safe energy management solution. Compatible with various electrical systems, it ensures reliable and long-lasting performance.

Description

The 100-250V ES 4P G400/500 Control Module is a device designed for the efficient management of electrical systems in industrial and commercial environments. This module allows for the safe and reliable control of electrical loads, ensuring optimal performance in applications requiring precise power regulation. Its robust construction and ability to operate within a voltage range of 100 to 250V make it a versatile solution for various electrical configurations.

- **Operating Voltage:** 100-250V
- **Connection Type:** 4-pole
- **Load Capacity:** G400/500
- **Dimensions:** Compact for easy installation
- **Material:** Robust and durable construction
- **Operating Temperature:** Wide range for demanding conditions
- **Protection:** Integrated safety system
- **Compatibility:** Ideal for industrial electrical systems
- **Certifications:** Complies with electrical safety regulations
- **Ease of Installation:** Intuitive design for quick integration

This module is a reliable option for those looking to optimize the control of their electrical systems, ensuring efficient and safe operation.

Specifications

EAN	3606481946539
Manufacturer	Schneider
No. of poles	4P

Reference	SCHNEIDER LX1G4SKUEN
Nominal voltage (V)	250V
