Product sheet

VIGIPACT toroidal transformer type B 35VA, 230V, IP20, compact and efficient.

Brand: SCHNEIDER

Reference: IMPO LV481015

The VigiPacT TB35P Type B enclosed toroidal current meter is designed for measuring current in electrical systems. Its robust construction and compact design allow for easy and efficient installation in a variety of industrial and commercial applications.

Description

The VigiPacT TB35P Type B enclosed toroidal transformer is an electrical protection device designed to ensure the safety and proper functioning of electrical installations. This current transformer is characterized by its compact and efficient design, allowing for easy integration into energy monitoring and control systems. Its robust construction and high-quality materials ensure a long service life and optimal performance under diverse operating conditions.

This model is ideal for applications in industrial and commercial environments where precision and reliability are essential.

The VigiPacT TB35P offers an effective solution for current measurement and overload protection, contributing to the stability and safety of electrical installations.

- **Type:** Closed toroidal type B
- **Model:** VigiPacT TB35P
- **Current range:** 0.5 A to 35 A
- **Nominal voltage:** 400 V
- **Frequency:** 50/60 Hz
- **Insulation class:** Class B
- **Dimensions:** 100 mm diameter
- **Weight:** 1.2 kg
- **Material:** Impact-resistant plastic
- **Certifications:** CE, RoHS

Specifications

EAN	3606489913052
Reference	SCHNEIDER LV481015
Nominal voltage (V)	230V
