Product sheet

SCHNEIDER 40 A single-phase counter, pulse measurement, precision and reliability.

Brand: SCHNEIDER

Reference: IMPO A9MEM2000

Single-phase 40A pulse meter, designed to measure electricity consumption in residential and industrial installations. Its accuracy and ease of installation make it a useful tool for energy monitoring and consumption management.

Description

The 40 A single-phase pulse meter is a device designed to measure and record electricity consumption in residential and industrial installations. This meter is characterized by its high accuracy and reliability, allowing for detailed monitoring of energy usage. Its compact design facilitates installation in electrical panels, while its intuitive interface allows for easy data reading. This model is ideal for applications requiring rigorous energy consumption control, contributing to resource optimization and reduced operating costs.

- **Current capacity:** 40 A
- **Connection type:** Single-phase
- **Accuracy:** High, with minimal margin of error
- **Measurement range:** Suitable for residential and industrial applications
- **Display:** Digital display for easy reading
- **Installation:** Compact and easy to install in electrical panels
- **Material:** Constructed with high-quality materials for greater durability
- **Standards:** Complies with current electrical safety regulations
- **Use:** Ideal for monitoring energy consumption
- **Warranty:** Includes manufacturer's warranty

Specifications

Rated current (A)	40
EAN	3606480217401
Reference	SCHNEIDER A9MEM2000
