Product sheet

SCHNEIDER 40 A single-phase current meter with compact design and easy installation.

Brand: SCHNEIDER

Reference: IMPO A9MEM2010

Single-phase 40A pulse meter, designed to measure and record electricity consumption in residential and industrial installations. Its accuracy and ease of installation make it a useful tool for energy monitoring.

Description

The 40 A single-phase pulse meter is a device designed to measure and record electricity consumption in residential and industrial installations. Its robust construction and advanced technology ensure high accuracy in energy metering, enabling effective monitoring of electricity usage. This meter is ideal for applications requiring rigorous consumption control, facilitating energy management and resource optimization. Its compact design allows for easy installation in standard electrical panels, ensuring simple integration into any existing electrical system.

- **Meter Type:** Single-phase
- **Maximum Capacity:** 40 A
- **Measuring Range:** Up to 40 A current
- **Accuracy:** High accuracy in energy measurement
- **Installation:** Easy installation in electrical panels
- **Display:** Digital display for clear reading
- **Connection:** Standard connection terminals
- **Standards:** Complies with electrical safety regulations
- **Dimensions:** Compact to optimize space
- **Durability:** Robust construction for long service life

Specifications

Rated current (A)	40
EAN	3606480217418
Reference	SCHNEIDER A9MEM2010
