

Product sheet

MAGNETOTERM 23A circuit breaker, 32A protection, ideal for electrical installations.

Brand: SCHNEIDER

Reference: IMPO GV3P32

The Disyunt Magnetoterm 23...32A is an electrical protection device that combines the functions of a circuit breaker and a residual current device (RCD). Designed to ensure safety in electrical installations, it offers a rapid response to overloads and short circuits, guaranteeing efficient operation.

Description

The 23...32A MAGNETOTERM CIRCUIT BREAKER is an electrical protection device designed to safeguard circuits and equipment in electrical installations. This circuit breaker combines overload and short-circuit protection functions, ensuring safe and efficient operation. Its compact and robust design allows for easy integration into electrical panels, while its advanced technology ensures a rapid response to any current anomaly. This model is ideal for residential and industrial applications, providing a reliable energy management solution.

- **Current Range:** 23 to 32 amps
- **Protection Type:** Circuit Breaker
- **Nominal Voltage:** 230/400 V
- **Tripping Curve:** C (suitable for inductive loads)
- **Dimensions:** Compact, easy to install in confined spaces
- **Construction Material:** Fire-resistant plastic
- **Connections:** Easily accessible terminals for quick installation
- **Certifications:** Complies with international safety standards
- **Operating Temperature:** -25°C to +60°C
- **Service life:** High durability and wear resistance

Specifications

Rated current (A)	23
EAN	3389119405386
Reference	SCHNEIDER GV3P32
