

Product sheet

NSX100 SCHNEIDER 100A 3-pole, 2.2G controller, ideal for electrical systems.

Brand: SCHNEIDER

Reference: IMPO C1032G100

The Ud.Control NSX100 AC 3P3R 100A 2.2G is a three-phase circuit breaker designed to protect electrical circuits. It offers a current capacity of 100A and features safety and efficiency characteristics for industrial and commercial applications.

Description

The Ud.Control NSX100 AC 3P3R 100A 2.2G is a control and protection device designed for industrial and commercial applications requiring efficient energy management. This unit is characterized by its robustness and reliability, offering a comprehensive solution for the protection of electrical circuits. Its compact design allows for easy installation in electrical panels, while its advanced technology ensures optimal performance under varying load conditions. Furthermore, it has features that facilitate the monitoring and control of energy consumption, contributing to the operational efficiency of the facilities.

- **Device Type:** Circuit Breaker
- **Rated Current:** 100A
- **Pole Configuration:** 3P3R (three phases and three returns)
- **Rated Voltage:** AC
- **Protection:** Overload and Short Circuit
- **Dimensions:** Compact for easy integration
- **Monitoring:** Advanced energy control functions
- **Installation:** Quick and easy on electrical panels
- **Applications:** Industrial and Commercial
- **Standards:** Complies with international safety standards

Specifications

Frequency	50/60 Hz
Rated current (A)	100
EAN	3606482000599
No. of poles	3P
Reference	SCHNEIDER C1032G100
