Product sheet

iID 2P 40A 300mA automatic switch with differential protection.

Brand: SCHNEIDER

Reference: IMPO A9R24240

The iID 2P 40A 300mA A is a double-pole circuit breaker designed to protect electrical circuits. It offers a current capacity of 40 amps and a sensitivity of 300 milliamps, ensuring safety and efficiency in electrical installations.

Description

The iID 2P 40A 300mA is an electrical protection device designed to ensure the safety and proper functioning of electrical installations in residential and industrial environments. This residual current device (RCD) is characterized by its ability to detect current leaks and automatically disconnect the circuit, minimizing the risk of electrocution and damage to connected equipment. Its compact and efficient design allows for easy integration into electrical panels, ensuring optimal performance in various applications.

- **Type:** Residual Current Circuit Breaker
- **Poles:** 2P (double pole)
- **Rated current:** 40A
- **Leakage current:** 300mA
- **Rated voltage:** 230/400V AC
- **Frequency:** 50/60Hz
- **Protection:** Class A
- **Dimensions:** 2 DIN rail modules
- **Installation:** DIN rail mounting
- **Certifications:** Complies with IEC and EN standards

This residual current circuit breaker is a A reliable solution for protecting electrical circuits, offering peace of mind and safety in everyday electricity use.

Specifications

Rated current (A)	40
Sensitivity	300 mA

EAN	3606480374692
No. of poles	2P
Reference	SCHNEIDER A9R24240
