Product sheet

4E ANALOGICAL module with 4 analog inputs and 24V voltage.

Brand: SCHNEIDER

Reference: IMPO TM3AI4

The 4E Analog Module is a device designed for specific applications in electronic systems. It offers connectivity and functionality in industrial environments, ensuring stable and efficient performance. Its compact design facilitates integration into various equipment configurations.

Description

The 4E Analog Module is a device designed for applications requiring precise and reliable control of analog signals. This module integrates easily into automation and control systems, offering a robust solution for analog data acquisition and processing. Its compact and efficient design allows for simple installation, while its advanced technology ensures optimal performance under diverse operating conditions. Ideal for industrial environments, the 4E Analog Module is compatible with a wide range of sensors and devices, facilitating real-time process monitoring and control.

- **Signal Type:** Analog
- **Input Range:** 0-10 V/4-20 mA
- **Resolution:** 16 bits
- **Sampling Rate:** 1 kHz
- **Connectivity:** Screw Terminals
- **Power Supply:** 24 V DC
- **Operating Temperature:** -20°C to 60°C
- **Dimensions:** 100 x 75 x 22 mm
- **Weight:** 200 g
- **Certifications:** CE, RoHS

Specifications

EAN	3606480648908
Reference	SCHNEIDER TM3AI4
Nominal voltage (V)	24V
