

Product sheet

TEMPO time delay on disconnection with adjustable time and 16A maximum capacity.

Brand: SCHNEIDER

Reference: IMPO RE22R1MKMR

Tempo is a time-delay device that allows you to program the shutdown time of electrical equipment. Its compact design facilitates installation in various environments, offering a practical solution for managing energy consumption efficiently.

Description

The Tempo is a time-delay device designed to optimize the operation of electrical and electronic equipment. This product allows you to program a specific time to disconnect, making it ideal for applications requiring a gradual or controlled shutdown. Its compact and functional design facilitates integration into various installations, ensuring efficient and safe performance. The Tempo is compatible with a wide range of devices, making it a versatile solution for home and industrial use.

- **Operating Voltage:** 230V AC
- **Delay Time Range:** 1 to 60 minutes
- **Load Capacity:** 16A
- **Dimensions:** 80 x 60 x 40 mm
- **Operating Temperature:** -10°C to 50°C
- **Installation:** Easy DIN rail mounting
- **LED Indicator:** Shows operating status
- **Protection:** Overload and short circuit
- **Certifications:** CE, RoHS
- **Material:** Plastic fire resistant

Specifications

Rated current (A)	5
EAN	3606480792571
