

Product sheet

MODULO brand 4E/2S ANALOGICAL module with 4 analog inputs and 2 analog outputs.

Brand: SCHNEIDER

Reference: IMPO TM3AM6

The 4E/2S Analog Module is a device designed for control and monitoring applications. It offers four analog inputs and two analog outputs, enabling efficient integration into automated systems. Ideal for industrial and automation environments.

Description

The 4E/2S Analog Module is a device designed for the integration and management of analog signals in automation and control systems. This module allows the connection of up to four analog inputs and two analog outputs, facilitating the monitoring and control of variables such as temperature, pressure, and level. Its compact and robust design ensures reliable performance in industrial environments, while its compatibility with various communication protocols makes it a versatile solution for different applications.

- **Analog Inputs:** 4 channels
- **Analog Outputs:** 2 channels
- **Voltage Range:** 0-10 V or 4-20 mA
- **Resolution:** 12 bits
- **Accuracy:** $\pm 0.5\%$ of full range
- **Connectivity:** Compatible with standard protocols
- **Operating Temperature:** -20°C to 60°C
- **Dimensions:** 100 x 75 x 22 mm
- **Weight:** 200 g
- **Mounting:** DIN rail

This module is ideal for applications requiring precise control and easy integration into automation systems, ensuring efficient and safe operation.

Specifications

EAN	3606480648946
Reference	SCHNEIDER TM3AM6
