

Product sheet

SCHNEIDER 45cm extended busbars + phase separator, durable material and easy installation.

Brand: SCHNEIDER

Reference: IMPO LV429224

45 cm extended busbars with neutral phase separator. Designed to facilitate electrical connection and distribution in installations. Manufactured with quality materials, they guarantee durability and efficiency. Ideal for electrical and electronic projects.

Description

The 45 cm extended busbar with N-phase separator is an essential component for electrical applications requiring efficient and safe power distribution. Designed to facilitate the installation and maintenance of electrical systems, this busbar offers a robust and reliable solution. Its high-quality construction ensures excellent conductivity and corrosion resistance, making it an ideal choice for industrial and commercial environments. The integrated N-phase separator allows for optimal conductor organization, minimizing the risk of short circuits and improving overall system safety.

- **Dimensions:** 45 cm in length
- **Material:** High-strength galvanized steel
- **Load capacity:** Suitable for medium and low voltage applications
- **N-phase separator:** Included for better conductor organization
- **Installation:** Quick and easy, compatible with different types of electrical systems
- **Corrosion resistance:** Surface treatment that extends the product's lifespan
- **Standards:** Complies with current electrical regulations
- **Use:** Ideal for industrial and commercial installations
- **Color:** Metallic finish
- **Compatibility:** Compatible with other standard electrical components

Specifications

EAN	3606480019746
No. of poles	4P
Reference	SCHNEIDER LV429224
