Description

The Modicon TM3 - 16 inputs (spring) 24Vdc is a digital input module designed for industrial applications requiring high reliability and flexibility in data acquisition. This device allows the connection of up to 16 input signals, facilitating integration into automation and control systems. Its spring-loaded terminal design ensures a secure and quick connection, minimizing installation and maintenance time. This module is compatible with various Modicon controller configurations, making it a versatile option for different working environments.

- **Module Type:** Digital Input
- **Number of Inputs:** 16
- **Connection:** Spring Terminals
- **Supply Voltage:** 24Vdc
- **Compatibility:** Modicon Controllers
- **Dimensions:** Compact for easy integration
- **Temperature Range:** Suitable for industrial environments
- **Certifications:** Complies with safety regulations
- **Installation:** Quick and easy
- **Applications:** Industrial automation, process control
