

Product sheet

MAGTER 2A circuit breaker, electrical protection, 2 amps, compact design.

Brand: SCHNEIDER

Reference: IMPO GB2CB07

The MAG-TER.UNI 2A circuit breaker is an electrical protection device designed to interrupt the flow of current in case of overload or short circuit. Its 2-amp capacity makes it suitable for specific applications in electrical systems.

Description

The MAG-TER.UNI 2A circuit breaker is an electrical protection device designed to ensure safety in electrical installations. This circuit breaker is characterized by its ability to automatically detect and disconnect circuits in case of overloads or short circuits, thus minimizing the risk of fires and damage to connected equipment. Its compact and efficient design allows for easy integration into electrical panels, ensuring optimal performance in various residential and industrial applications.

- **Model:** MAG-TER.UNI 2A
- **Rated current:** 2 amps
- **Rated voltage:** 230V AC
- **Circuit breaker type:** Single-phase
- **Overload protection:** Yes
- **Short-circuit protection:** Yes
- **Dimensions:** 80 x 40 x 60 mm
- **Weight:** 0.25 kg
- **Certifications:** CE, IEC 60898
- **Operating temperature:** -5°C to +40°C

This circuit breaker is a reliable solution for those looking to protect their electrical installations effectively and safely.

Specifications

Rated current (A)	2
EAN	3389110214611
No. of poles	1P

Reference	SCHNEIDER GB2CB07
