Product sheet

SCHNEIDER X automatic switch power 16A, 230V, IP20.

Brand: SCHNEIDER

Reference: IMPO GB2CB09

The Control Circuit Breaker is a device designed to protect electrical circuits from overloads and short circuits. It is easy to install and ensures safe operation, contributing to the stability and durability of electrical systems in various applications.

Description

The CONTROL CIRCUIT BREAKER is an essential device for the protection of electrical circuits, designed to interrupt the flow of current in case of overloads or short circuits. This circuit breaker ensures the safety of equipment and the integrity of electrical installations, preventing costly damage and fire hazards. Its robust construction and advanced technology allow for reliable and efficient operation, adapting to various industrial and commercial applications. With a compact design, it is easy to install and maintain, making it a practical solution for any electrical system.

- **Type:** Circuit breaker
- **Rated capacity:** Up to 100 A
- **Operating voltage:** 230/400 V
- **Protection:** Overload and short circuit
- **Material:** Fire-resistant plastic
- **Mounting:** On DIN rail
- **Certifications:** IEC, UL, CE
- **Operating temperature:** -20°C to +60°C
- **Dimensions:** 100 x 75 x 50 mm
- **Weight:** 300 g

Specifications

Rated current (A)	16
EAN	3389110214680
No. of poles	1P
Reference	SCHNEIDER GB2CB09
Nominal voltage (V)	230V
