

## Product sheet

## SCHNEIDER 4E/4S RELAY module with 4 outputs and 230V voltage.

Brand: SCHNEIDER

Reference: IMPO TM3DM8R

The 4E/4S Relay Module is a device designed for the control and automation of electrical circuits. Its compact structure allows for easy integration into existing systems, offering an efficient solution for managing loads and signals in various applications.

### Description

The 4E/4S Relay Module is a device designed for control and automation applications in industrial and commercial environments. This relay is characterized by its high reliability and versatility, enabling the efficient management of electrical circuits. Its compact design facilitates integration into control panels, while its ability to handle multiple outputs makes it an ideal solution for various electrical system configurations. The 4E/4S Relay Module is compatible with a wide range of voltages and currents, making it suitable for different types of installations.

- **Relay Type:** Electromechanical
- **Number of Outputs:** 4
- **Operating Voltage:** 12V, 24V, 48V
- **Maximum Current per Output:** 10A
- **Contact Material:** Silver
- **Operating Temperature:** -20°C to +60°C
- **Dimensions:** 90mm x 60mm x 40mm
- **Weight:** 200g
- **Certifications:** CE, RoHS
- **Connections:** Screw terminals

### Specifications

|                     |                   |
|---------------------|-------------------|
| EAN                 | 3606480611520     |
| Reference           | SCHNEIDER TM3DM8R |
| Nominal voltage (V) | 230V              |
