

Product sheet

SCHNEIDER 2..20A current relay, integrated transformer, IP20.

Brand: SCHNEIDER

Reference: IMPO RM17JC00MW

Integrated transformer with a current range of 2 to 20 A. Ideal for applications requiring a constant and efficient power supply. Its compact design facilitates installation in various environments, ensuring optimal and safe operation.

Description

The 2.20A Overcurrent Relay with Integrated Transformer is a device designed for the protection and control of electrical circuits, offering an efficient and reliable solution for current monitoring. This overcurrent relay features an integrated transformer that allows for easy installation and optimal operation in various industrial and commercial applications. Its robust and compact design ensures a long service life, while its current adjustment capability makes it versatile for different needs. This product is ideal for environments where electrical safety is paramount, guaranteeing the protection of equipment and systems against overloads.

- **Current range:** 2 to 20 A
- **Integrated transformer:** simplifies installation
- **Overload protection:** ensures system integrity
- **Compact design:** optimizes space in electrical panels
- **Easy adjustment:** allows for customized configurations
- **LED indicator:** displays the operating status
- **Quick connections:** simplify installation
- **Operating temperature:** -10°C to 50°C
- **Certifications:** complies with safety regulations
- **Applications:** ideal for industrial systems and commercial

Specifications

Rated current (A)	5
EAN	3389119405034
Reference	SCHNEIDER RM17JC00MW
