

Product sheet

4 TERMINAL 185mm² connector + phase separation, ideal for electrical installations.

Brand: SCHNEIDER

Reference: IMPO LV429258

185 mm² cable terminals with phase separation. Designed for safe and efficient electrical connections. Manufactured from high-quality materials, they guarantee durability and performance in various industrial and commercial applications. Ideal for demanding electrical installations.

Description

The 185mm² cable terminal with phase separation is an essential component for electrical installations requiring a safe and efficient connection. Designed to withstand high currents, this terminal guarantees excellent conductivity and corrosion resistance, making it an ideal choice for industrial and commercial applications. Its robust construction allows for easy installation and reliable performance under demanding conditions. Phase separation provides greater safety and facilitates conductor identification, minimizing the risk of connection errors.

- **Material:** High-conductivity copper alloy
- **Cable cross-section:** 185 mm²
- **Connection type:** Screw
- **Phase separation:** Included for added safety
- **Corrosion resistance:** Surface treatment for extended service life
- **Operating temperature:** Up to 90°C
- **Standards:** Meets international quality standards
- **Dimensions:** Compact for easy installation in confined spaces
- **Applications:** Ideal for industrial and commercial electrical systems
- **Certifications:** Certified by electrical safety agencies

Specifications

Rated current (A)	250
EAN	3606480019463
No. of poles	4P
Reference	SCHNEIDER LV429258
