

Product sheet

SCHNEIDER REL RELAY controller, current range 4mA-1A, voltage 24-240V.

Brand: SCHNEIDER

Reference: IMPO RM22JA31MR

I,I,I control relay, designed to operate with currents from 4mA to 1A and voltages from 24 to 240V. Ideal for industrial applications, it ensures efficient and safe operation in electrical systems. Compact and easy to install.

Description

The Rel□The I,I,I control relay is a high-precision control device designed for industrial applications requiring a current range of 4mA to 1A and an operating voltage of 24 to 240V. This relay is characterized by its robustness and reliability, enabling efficient control of electrical circuits under diverse operating conditions. Its compact design facilitates integration into control panels and automated systems, while its advanced technology ensures optimal performance and a long service life. This relay is ideal for use in process monitoring and control systems, ensuring a fast and accurate response to current variations.

- **Current Range:** 4mA - 1A
- **Operating Voltage:** 24 - 240V
- **Device Type:** Control Relay
- **Compact Design:** Facilitates installation on control panels
- **High Reliability:** Ideal for industrial applications
- **Fast Response:** Efficient in the face of current variations
- **Long Service Life:** Advanced technology for lasting performance
- **Applications:** Process monitoring and control systems
- **Connections:** Simple and secure for easy installation
- **Regulations:** Complies with industrial safety standards

Specifications

Rated current (A)	8
Sensitivity	4
EAN	3606480792298
Reference	SCHNEIDER RM22JA31MR
Nominal voltage (V)	240
