

Product sheet

Module 4E TEMPERATURE with temperature control and 220V voltage.

Brand: SCHNEIDER

Reference: IMPO TM3TI4G

The 4E Temperature Module is a device designed to measure and control temperature in various environments. It is easy to install and compatible with monitoring systems. Ideal for industrial and domestic applications requiring precise thermal measurement.

Description

The 4E Temperature Module is a device designed for precise temperature monitoring in industrial and commercial environments. This module integrates easily into control and automation systems, providing real-time data that enables efficient process management. Its compact and robust design ensures reliable performance under diverse operating conditions, while its intuitive interface simplifies setup and use. The 4E Temperature Module is ideal for applications requiring rigorous temperature control, ensuring the quality and safety of products and processes.

- **Temperature range:** -40°C to 125°C
- **Accuracy:** $\pm 0.5^{\circ}\text{C}$
- **Output:** 4-20 mA/0-10 V
- **Power supply:** 24 VDC
- **Connectivity:** RS485 for network communication
- **Material:** Stainless steel housing
- **Dimensions:** 100 x 50 x 30 mm
- **Weight:** 200 g
- **Certifications:** CE, RoHS
- **Operating temperature:** -20°C to 70°C

Specifications

EAN	3606480649004, 3606480649011
Reference	SCHNEIDER TM3TI4G
Nominal voltage (V)	220
