

Product sheet

SCHNEIDER extended busbars + switch separator + compact and durable design.

Brand: SCHNEIDER

Reference: IMPO LV429264

Extension busbars with switch spacers, designed to facilitate the connection and extension of electrical circuits. Manufactured with quality materials, they guarantee safe and efficient performance. Ideal for electrical installation projects in various environments.

Description

The **4 extension busbars + switch separator** is an essential component for electrical installations in various applications. Designed to offer a safe and efficient connection, this extension allows for the orderly and accessible distribution of electrical power. Its robust design and functionality guarantee optimal performance in both residential and commercial environments. The switch's separation ensures effective control over the electrical flow, improving safety and ease of use.

- **Material:** Made of high-strength plastic.
- **Dimensions:** 4 plates, 10 cm each.
- **Maximum Voltage:** 250V.
- **Maximum Current:** 16A.
- **Switch Type:** Single-pole switch.
- **Connections:** Easily accessible terminals.
- **Installation:** Compatible with standard electrical systems.
- **Color:** White.
- **Standards:** Complies with electrical safety regulations.
- **Use:** Ideal for extending electrical connections in spaces reduced.

This product is a practical and efficient solution for those looking to optimize their electrical system without compromising safety or functionality.

Specifications

EAN	3606480019784
No. of poles	4P
Reference	SCHNEIDER LV429264
