Product sheet

SCHNEIDER Multi9 switch with 2-100mA auxiliary current and bottom connection.

Brand: SCHNEIDER

Reference: IMPO M9A26914

The Multi9 M9A OF is a bottom-wiring device designed for currents from 2 to 100 mA. Ideal for industrial applications, it offers an efficient and reliable solution for managing electrical circuits in diverse environments.

Description

The Multi9 M9A OF is a connection device designed for low-voltage applications, enabling a wide range of configurations in electrical systems. This specific model is designed to work with currents from 2 to 100 mA, making it a versatile option for various installations. Its robust and compact design facilitates integration into electrical panels, ensuring reliable and safe performance. Furthermore, its modular design allows for easy expansion and adaptation to different operational needs.

- **Model:** Multi9 M9A OF
- **Connection Type:** Bottom Wiring
- **Current Range:** 2-100 mA
- **Applications:** Low-voltage electrical systems
- **Design:** Modular and compact
- **Installation Ease:** Simple integration into electrical panels
- **Materials:** High strength and durability
- **Standards:** Complies with electrical safety standards
- **Compatibility:** Suitable for various electrical configurations
- **Dimensions:** Compact to optimize space

Specifications

Sensitivity	100
EAN	3606482129207
