

Product sheet

REL.SOBRE O SUB 0,15..15A regulator with adjustable intensity control.

Brand: SCHNEIDER

Reference: IMPO RM35JA32MW

Over/under current relay with a range of 0.15 to 15A. Designed to protect electrical circuits, this device ensures safe and efficient operation. Ideal for industrial and domestic applications, it is easy to install and requires minimal maintenance.

Description

The 0.15-15A Over/Under Current Relay is a device designed for measuring and controlling electrical current in industrial and commercial applications. This relay allows for precise monitoring of current intensity, ensuring the safe and efficient operation of connected equipment. Its robust and compact design facilitates installation in various environments, while its measuring range of 0.15 to 15 amps makes it versatile for diverse applications. This product is ideal for circuit protection and energy consumption optimization.

- **Measuring range:** 0.15 to 15 A
- **Installation type:** Surface or under panel mounting
- **Accuracy:** High accuracy in current measurement
- **Material:** Robust construction for industrial environments
- **Connections:** Easily accessible terminals for quick installation
- **Compatibility:** Compatible with a wide range of electrical devices
- **Protection:** Overload and short-circuit protection
- **LED indicator:** Operating status indicator light
- **Dimensions:** Compact for easy integration in confined spaces
- **Standards:** Complies with safety standards electric

Specifications

Rated current (A)	5
EAN	3389119405225
