

Product sheet

SCHNEIDER ATS01 22A 380-415V three-phase 2-phase automatic circuit breaker.

Brand: SCHNEIDER

Reference: IMPO ATS01N222QN

The ATS01 22A 380-415V Three-Phase 2-Phase is a device designed for the control and management of electric motors. It offers efficient operation in three-phase systems, ensuring optimal performance and easy integration into various industrial applications.

Description

The ATS01 22A 380-415V Three-Phase 2-Phase is a frequency inverter designed to optimize the control of electric motors in industrial applications. This device enables soft starting and precise speed control, resulting in greater energy efficiency and reduced mechanical wear. Its robust and compact design facilitates integration into various work environments, while its intuitive interface allows for quick and easy configuration. Thanks to its ability to handle voltages up to 415V, it is ideal for a wide range of applications, from pumps to fans and compressors.

- **Input Voltage:** 380-415V three-phase
- **Rated Current:** 22A
- **Speed Control:** Proportional to frequency
- **Protection:** Against overloads and short circuits
- **Interface:** LCD screen for easy configuration
- **Dimensions:** Compact for easy installation
- **Operating Temperature Range:** -10°C to 50°C
- **Certifications:** CE, UL, RoHS
- **Additional Functions:** Soft start/stop, torque control
- **Applications:** Ideal for induction motors in industrial environments

Specifications

Rated current (A)	22
EAN	3389110667318
Reference	SCHNEIDER ATS01N222QN
Nominal voltage (V)	415
