

Product sheet

UVN 24V controller with zero speed and screw for easy installation.

Brand: SCHNEIDER

Reference: IMPO XPSUVN11AP

The UVN 24V screwless zero-speed safety device is designed to ensure protection in electrical systems. Its operation is based on the automatic interruption of current flow, guaranteeing a safe and efficient environment.

Description

The UVN 24V zero speed sensor is a device designed for applications requiring precise speed control and safe operation in industrial environments. This model is characterized by its robustness and reliability, offering optimal performance under demanding conditions. Its compact design allows for easy integration into existing systems, while its advanced technology ensures efficient and stable speed control, even under varying loads.

- **Operating Voltage:** 24V DC
- **Motor Type:** Brushed DC Motor
- **Speed Control:** Zero Speed Regulation
- **Dimensions:** Compact, ideal for confined spaces
- **Construction Material:** High-strength alloy
- **Operating Temperature:** -10°C to 50°C
- **Protection:** IP54, dust and splash resistant
- **Connections:** Screw for easy installation
- **Applications:** Industrial automation, robotics, conveyor systems
- **Certifications:** Complies with safety and quality standards

This model is ideal for those seeking a balance between efficiency and durability in their industrial projects.

Specifications

EAN	3606482034051
Reference	SCHNEIDER XPSUVN11AP
Series	Solera Mural
