

## Product sheet

## Compact ATV320C 0.75kW 230V MONO variable frequency drive with speed control and easy installation.

Brand: SCHNEIDER

Reference: IMPO ATV320U07M2C

The ATV320C is a compact, 0.75 kW, 230V single-phase frequency inverter. Designed for industrial applications, it offers precise control of electric motors, optimizing performance and energy efficiency in a variety of installations.

### Description

The ATV320C 0.75kW 230V single-phase compact frequency inverter is designed for industrial applications requiring precise speed and torque control. Its compact design allows for easy integration into confined spaces, while its advanced technology ensures efficient and reliable performance. This drive is ideal for induction motors and applications requiring variable speed control, offering a versatile solution for diverse automation needs.

- **Rated power:** 0.75 kW
- **Supply voltage:** 230V single-phase
- **Compact design:** optimized for confined spaces
- **Speed control:** precise and efficient
- **Compatibility:** suitable for induction motors
- **User interface:** intuitive and easy to use
- **Protection:** against overloads and short circuits
- **Frequency range:** adjustable for various applications
- **Connectivity:** flexible communication options
- **Applications:** ideal for pumps, fans, and conveyors

The ATV320C is a reliable option for those looking for a frequency inverter that combines efficiency, versatility, and a design that adapts to different working environments.

### Specifications

|                     |                        |
|---------------------|------------------------|
| EAN                 | 3606480966545          |
| Reference           | SCHNEIDER ATV320U07M2C |
| Nominal voltage (V) | 230V                   |
