

Product sheet

Compact SCHNEIDER ATV320C 1.1kW 400V three-phase variable frequency drive for motor control.

Brand: SCHNEIDER

Reference: IMPO ATV320U11N4C

The ATV320C is a compact 1.1 kW, 400V three-phase frequency inverter. Designed for industrial applications, it offers efficient motor control and easy installation, ideal for optimizing performance in demanding work environments.

Description

The ATV320C 1.1kW 400V three-phase is a compact frequency inverter designed to optimize the control of electric motors in industrial applications. Its robust and efficient design allows for superior performance in demanding environments, ensuring reliable operation and significant energy savings. This drive is ideal for a wide range of applications, from pumps and fans to conveyor belts, thanks to its versatility and ease of integration into existing systems.

- **Rated power:** 1.1 kW
- **Supply voltage:** 400V three-phase
- **Frequency range:** 0 to 400 Hz
- **Protection rating:** IP20
- **Dimensions:** Compact, optimizing space on control panels
- **User interface:** Intuitive LCD screen for easy configuration and monitoring
- **Communication protocols:** Compatible with Modbus and other industry standards
- **Safety features:** Overload and short-circuit protection
- **Motor control:** Vector and voltage control for optimal performance optimal
- **Applications:** Suitable for various industries, including HVAC, processing and manufacturing

Specifications

EAN	3606480966743
Reference	SCHNEIDER ATV320U11N4C
Nominal voltage (V)	380V

may contain errors or omissions and does not replace the manufacturer datasheet.
