

Product sheet

Acti9 A9A 0.1-6A switch with bottom connection and auxiliary protection.

Brand: SCHNEIDER

Reference: IMPO A9A26907

The Acti9 A9A iSD bottom wiring is a 0.1-6A auxiliary device designed to simplify electrical installation. Its compact and functional design allows for efficient connection, ideal for applications requiring precise current control.

Description

The Acti9 A9A iSD bottom wiring 0.1-6A aux is a protection and control device designed for electrical applications requiring precise current management. This residual current device (RCD) is characterized by its high reliability and its ability to automatically detect and disconnect circuits in case of faults, thus ensuring the safety of electrical installations. Its compact design allows for easy integration into electrical panels, optimizing space and facilitating maintenance. Furthermore, its adjustable current range of 0.1 to 6A makes it versatile for various applications, from residential to industrial environments.

- **Model:** Acti9 A9A iSD
- **Connection Type:** Bottom-wired
- **Current Range:** 0.1-6A
- **Protection:** Residual Current Device (RCD)
- **Standards:** Complies with international electrical safety standards
- **Dimensions:** Compact for easy installation
- **Operating Temperature:** Wide range for various environmental conditions
- **Status Indicator:** LED light for easy viewing
- **Applications:** Residential and industrial
- **Certifications:** Certified by safety organizations electric

Specifications

Rated current (A)	6
EAN	3606486115183
Reference	SCHNEIDER A9A26907
