

Product sheet

Acti9 A9A 2-100mA switch with bottom connection and auxiliary protection.

Brand: SCHNEIDER

Reference: IMPO A9A26914

The Acti9 A9A iOF is a bottom-mounted electrical protection device designed to detect leakage currents from 2 to 100 mA. Ideal for residential and industrial applications, it ensures the safety and proper functioning of electrical installations.

Description

The Acti9 A9A iOF bottom wiring 2-100mA aux is a protection and control device designed for electrical applications requiring precise monitoring of leakage currents. This device integrates easily into electrical systems, providing an efficient and reliable solution for installation safety. Its compact and functional design allows for simple installation, while its adjustable sensitivity between 2 and 100 mA makes it a versatile option for various needs. Furthermore, it features a bottom-mounted connection system that optimizes space in the electrical panel, facilitating circuit maintenance and management.

- **Model:** Acti9 A9A iOF
- **Connection Type:** Bottom wiring
- **Sensitivity Range:** 2-100 mA
- **Function:** Leakage current protection
- **Installation:** Quick and easy
- **Dimensions:** Compact to optimize space
- **Applications:** Residential and industrial
- **Standards:** Complies with electrical safety standards
- **Accessories:** Compatible with other Acti9 devices
- **Warranty:** 2 years

Specifications

Sensitivity	100
EAN	3606482129139
Reference	SCHNEIDER A9A26914
