

Product sheet

iMX 100-415VAC switch with 415V voltage and compact design.

Brand: SCHNEIDER

Reference: IMPO A9A26946

The iMX+OF 100-415VAC is a device designed to operate within a voltage range of 100 to 415 VAC. Its robust and efficient construction makes it suitable for various industrial applications, ensuring reliable and long-lasting performance.

Description

The iMX+OF 100-415VAC is a control and monitoring device designed for industrial applications requiring efficient energy management. This equipment is characterized by its robustness and versatility, allowing for integration into electrical systems of various configurations. Its modular design facilitates installation and maintenance, while its advanced technology ensures optimal performance under demanding conditions. With an operating voltage range of 100 to 415 VAC, the iMX+OF is ideal for industrial environments where reliability and accuracy are critical.

- **Operating Voltage:** 100-415 VAC
- **Device Type:** Industrial Control and Monitoring
- **Design:** Modular and easy to install
- **Temperature Range:** Suitable for demanding environments
- **Connectivity:** Compatible with diverse electrical systems
- **Functions:** Energy monitoring and load management
- **Dimensions:** Compact for space optimization
- **Certifications:** Complies with industrial standards
- **Durability:** Robust construction for extended use
- **Support Technical support:** Assistance available for installation and configuration

Specifications

EAN	3606480088049
Reference	SCHNEIDER A9A26946
Nominal voltage (V)	415
