

Product sheet

Smartlink MODBUS controller with 11 digital channels, RS485 connection, easy installation.

Brand: SCHNEIDER

Reference: IMPO A9XMSB11

The Smartlink Modbus is a device that manages 11 digital channels. Ideal for automation applications, it facilitates communication and control of systems using the Modbus protocol, ensuring efficient integration in industrial environments.

Description

The Smartlink Modbus 11-channel digital module is a device designed for the integration and control of automated systems in industrial and commercial environments. This module enables efficient communication via the Modbus protocol, facilitating the monitoring and control of multiple connected devices. Its compact and robust design ensures reliable performance in a variety of applications, from energy management to process automation. With the ability to handle up to 11 digital channels, the Smartlink Modbus becomes a versatile solution for expanding existing control systems.

- **Supported Protocols:** Modbus RTU and Modbus TCP
- **Number of Channels:** 11 digital channels
- **Power Supply:** 24V DC
- **Connectivity:** RS-485 and Ethernet
- **Operating Temperature:** -20°C to 60°C
- **Dimensions:** 100 x 75 x 25 mm
- **Weight:** 200 g
- **Certifications:** CE, RoHS
- **User Interface:** LED status indicators
- **Compatibility:** Compatible with most SCADA systems

Specifications

EAN	3606480430602
Reference	SCHNEIDER A9XMSB11
Series	Solera Mural
