

Product sheet

ESX Server Panel 110-277VAC/DC with versatile input and high energy efficiency.

Brand: SCHNEIDER

Reference: IMPO PAS400

The ESX PANEL SERVER ENTRY 110-277VACDC is a device designed for power management in industrial environments. It offers compatibility with input voltages from 110 to 277 VAC/DC, ensuring efficient and reliable performance in a variety of applications.

Description

The ESX PANEL SERVER ENTRY 110-277VACDC is a device designed to provide an efficient and reliable power management solution for servers and electronic equipment. Its robust construction allows for easy integration into industrial and commercial environments, ensuring optimal performance in a variety of applications. This entry panel is characterized by its ability to operate across a wide voltage range, making it a versatile option for different electrical configurations. Its compact design facilitates installation and maintenance, while its high-quality construction ensures durability and resistance to adverse conditions.

- **Input Voltage:** 110-277VAC/DC
- **Load Capacity:** Suitable for high-demand equipment
- **Dimensions:** Compact for easy installation
- **Material:** Robust and durable construction
- **Operating Temperature:** Wide range for diverse environmental conditions
- **Connectivity:** Compatible with multiple electrical systems
- **Certifications:** Complies with safety and energy efficiency standards
- **Installation:** Simple and quick, with clear instructions
- **Maintenance:** Low requirement, designed for long service life
- **Applications:** Ideal for servers, data centers, and industrial equipment

Specifications

EAN	3606481014313
Reference	SCHNEIDER PAS400
Series	Solera Mural
