

Product sheet

SETA latchable push button kit with 10A and 230V voltage for efficient control.

Brand: SCHNEIDER

Reference: IMPO GV2K04

The Latchable Mushroom Pushbutton Kit is a device designed for controlling machinery and electrical systems. Its compact and functional design allows for easy installation and use, ensuring safe and efficient operation in various industrial applications.

Description

The Latching Mushroom Pushbutton Kit is a device designed for industrial and automation applications, enabling efficient and safe control of machinery and equipment. Its compact and robust design makes it ideal for demanding work environments, guaranteeing a long service life and optimal performance. This latching pushbutton is characterized by its easy installation and maintenance, making it a practical solution for various control configurations. Its locking mechanism provides a reliable response, ensuring the device remains in the desired position during operation.

- **Pushbutton Type:** Latching Mushroom
- **Material:** Impact-resistant plastic
- **Dimensions:** 22 mm diameter
- **Operating Voltage:** 24V DC
- **Maximum Current:** 10A
- **Protection Rating:** IP65
- **Operating Temperature:** -20°C to +55°C
- **Available Colors:** Red, Green, Yellow
- **Certifications:** CE, RoHS
- **Applications:** Machinery control, security systems, industrial automation
