Product sheet

SCHNEIDER SELECTOR 3-position selector switch with key and 10A maximum current.

Brand: SCHNEIDER

Reference: IMPO XB5AG03

3-position NO+NO selector switch with lock. Designed for easy control of electrical circuits, this device offers a versatile and safe option for various applications. Its robust construction ensures durability and reliable operation in demanding environments.

Description

The **3POSITION NO+NO KEYED SELECTOR** is a high-quality device designed to offer precise and safe control in electrical applications. Its robust and functional structure allows for easy integration into various systems, ensuring optimal performance in industrial and commercial environments. This selector has three positions that allow for clear and efficient selection, facilitating the operation and maintenance of electrical equipment. Its keyed design provides an additional level of security, preventing unauthorized tampering and ensuring the proper functioning of the system.

- **Type:** 3-position selector switch
- **Material:** Durable and resistant plastic
- **Connections:** NO + NO
- **Security:** Includes locking key
- **Dimensions:** Compact for easy installation
- **Operating temperature:** -10°C to 60°C
- **Nominal voltage:** 250V
- **Nominal current:** 10A
- **Certifications:** Complies with international standards
- **Applications:** Ideal for machinery, electrical panels, and control systems

Specifications

Rated current (A)	10
EAN	3389110903478
